I am a full-stack developer with 5 years of experience working with Laravel, React, Vuejs and NodeJs. I have led teams to build popular applications used by thousands of users. My applications always speak personally to the user's experience and I love making people's life easier with great, intuitive, and user-friendly apps!

WORK EXPERIENCE

FullStack Developer at BexIT Digital Sytems   (2022 - Present)
Vue Js, Laravel

Built Bizcards, a business card creator and wallet.
https://bizzcard.net/

- Deployed using AWS EC2.
- Deployed apps using Linux systems, dedicated, and cloud systems.
- Worked with SQL, and NoSQL databases.

🔗 https://www.bexit.com.ng/

Lead Developer at Dalostars Limited   (2019 - 2022)
Laravel, Node & Javascript Frameworks

Built several very large and complex applications using various languages. Worked mostly with E-commerce and other applications that involve complex payment systems.

- Built projects using Angular, React, Vue Js, Laravel, and Node.
- Deployed apps using Linux systems, dedicated, and cloud systems.
- Worked with SQL, and NoSQL databases.

Software Developer at Upperlink Lmited   (2018 - 2019)
Payment Middleware Developer and Manager, Ebills-Pay System

Ebills-Pay is a multi-vendor Payment system built for the Nigeria Inter-Bank Settlement System (NIBSS).

- Ebills-Pay is used by vendors to collect payment from users through their various apps
- I specifically built middlewares that convert vendor data in any format into java-based XML which is used internally by Ebills-Pay.
- Languages I used: Php

PROJECTS

Bizcard
Electronic Wallet System

Bizcard is an electronic wallet system for creating and managing business cards.

🔗 https://bizzcard.net/

Ebills Payment System
A payment system for all types of businesses.

EfContact is a multi-vendor Payment integration system launched by the Nigeria Interbank Settlement System. I specifically built microservices that integrate vendors' payment platform into Ebills pay

Hobeei
Freecycling System

Hobeei is a frecycling platform where you can exchange unused items for tokens. This is to help various less priviledged people all over the wolrd acquire items that they need for free.

🔗 https://www.hobeei.com/

LajServer
Hosting and Domains platform for all businesses

Lajserver provides Domain registration and hosting services for all business at very affordable rates. I built the front end using Html, Css and Javascript.

🔗 https://lajserver.lajela.com.ng/

EfContact
Multi Vendor Classified Ads System.

EfContact is a multi vendor Classified Ads System. . I built the front end using Laravel and Ajax.

Topklass Ecommerce Store
Full Ecommerce built with MERN Stack.

Topklass is a full e-commerce built with MERN Stack.
